

AI MEETS IT

Merging Improv and Technology Together

Disclaimer

Information contained in this presentation is presented "as is," without warranty of any kind. In particular, Humor That Works, its employees, officers, members, fans, friends, acquaintances, and people who have mistakenly used the phrase "humor that works" in a sentence, make no warranties, representations, expressed or implied, as to the fitness for a particular purpose or merchantability of any product, apparatus, service, image, idea, font, joke, pun or story, or the usefulness, completeness, or accuracy of any processes, methods, memorized text, or other information contained, described, disclosed, implied, not implied, inferred, referred, or thought about herein.

Additionally, the following disclaimers hold true for the aforementioned presentation that follows:

- 1.** Humor That Works makes no claims that they have solved every problem and has the perfect, one-stop-shop, one-size-fits-all, no-holds-barred, guaranteed-to-work-all-the-time solution, but rather is presenting ideas to help push forward the ideas and theories presented here.
- 2.** This presentation is not your standard-fare, taxi fare, or laissez-faire when it comes to training. This presentation will be Interactive and Fun. This interaction and fun will not hinder the audience's ability to comprehend, understand, retain or otherwise use the valuable content that follows. In fact, it is likely said interaction and fun will enhance the audience's ability to comprehend, understand, retain or otherwise use the valuable content that follows.
- 3.** While Humor That Works employs smart, talented, educated, charming, and handsome people, Humor That Works also understands that the Audience is Smart. Humor That Works does not pretend to be an expert in the field in which the audience is working. In fact, Humor That Works can almost guarantee that Humor That Works does not know nearly as much as the audience about the company, industry, region, building, customers, clients, users, or anything else in which the audience interacts.
- 4.** Rather, Humor That Works contends to be an expert in training, facilitation, humor, simplifying concepts, and, using humor to be more productive, less stressed, and more awesome. The goal is for every audience member (every single one, no audience member left behind), to look for One Idea that will change the way they work. One idea that is new to them, or perhaps just a reminder of something they've learned before, that causes them to change the way they work for the better. That's it. Only one single idea. That's not so hard, is it?
- 5.** Finally, Humor That Works can guarantee, with near 100% certainty, and without reservation, hesitation or regret, that there will be Puns in this presentation. They will likely be puns that make you groan, boo, or otherwise throw a hissy fit. Humor That Works makes no apologies for this and will continue to pun regardless of audience response. These puns are not for the audience, but for the amusement of the Humor That Works presenters. After all, Humor That Works created the presentation so they should get some say as to what's included.
- 6.** There may be additional things that need disclaiming, such as items regarding liability (we are not liable for stuff, ya' know), and endorsement (things Humor That Works references or retweets aren't necessarily endorsements, unless the speaker specifically says "I endorse this" and even then you have to determine the level of facetiousness employed). Also anything else we might have reasonably forgotten, such as telepathy, telekinesis and use of the force.

JAN 29 THE 8PM

GEORGIA TECH IMPROV FESTIVAL

Intro to Tech

REGISTER

Ready Player One: Intro to Improv Tech with
Lindsey McGowen

Sunday, August 30, 4:30-6:30pm (2 hours)

Ready to get your tech ninjutsu on? Come learn how to build worlds for the stage improvisors to inhabit and heighten and support from the booth through an engaging mix of theory, games and exercises. We will cover lights, scoring and sound effects use and the various

tools of the trade. Recommended for anyone with an interest in technical improv, regardless of level of experience.

GATHERING MATERIAL

ASSIGNMENT

- Go to a busy public place and spend two or three hours just sitting and watching people. As you observe, write down as much as you can about the people you see, the conversations they have, and the things they do. When you get home, read through your notes. Circle moments and interactions that strike you as funny, and underline bits that feel like basic human truths or experiences that anyone can relate to. As you start to shape your voice and create an act in the next few chapters, you'll mine this material to craft a comedic performance.

Story Spine Form

A simple form for filling out a story spine.

Once upon a time there was...

Introduce the main character.

Your answer

Every day...

Establish the routine of the world.

gethumor.org/storyspine

But one day...

Break the routine.

Your answer

Because of that...

Share the consequences of the broken routine.

Your answer

Because of that...

ACTION ITEMS

The background of the slide is a light blue-tinted photograph. In the center, a crash test dummy stands with its arms slightly out. To the left of the dummy is a silver Slinky toy. To the right of the dummy is a Rubik's cube. The overall scene suggests a focus on physics or engineering experiments.
